

# ROQ PACK

## PACKING MACHINE

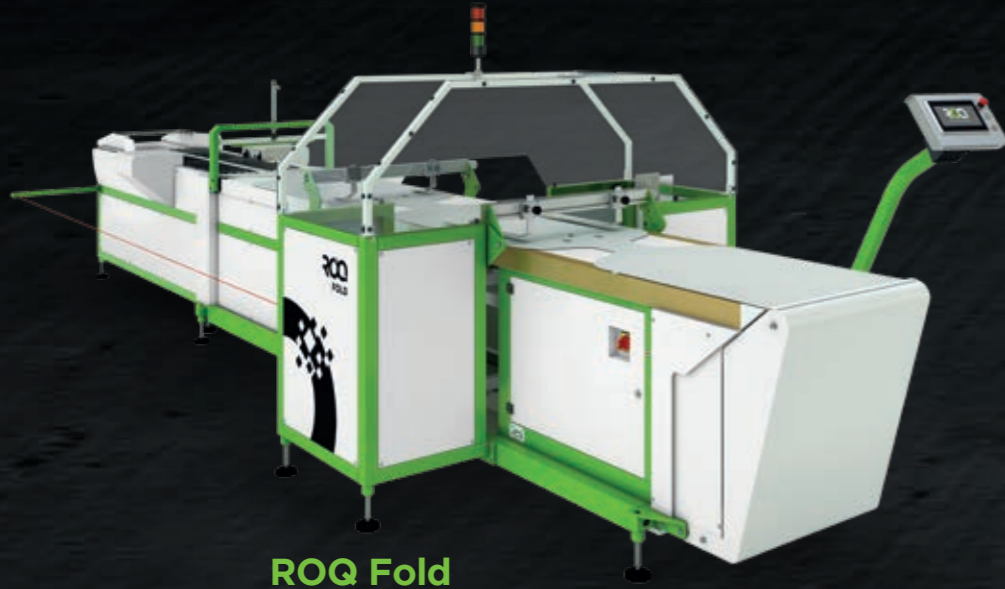

**1200**  
PIECES/HOUR\*\*

ROQ Pack is designed to pack different types of garments.

The machine receives the folded garments and creates a complete bag made out of 2 rolls of plastic. The bag is done through a flawless plastic welding system, it has an automatic system for collecting the plastic waste and allows for unlimited bag length. It can be coupled with the ROQ Fold and the ROQ Label, in line or at a 90° angle depending on the available space. It can create a flap bag or weld it directly. The ROQ Pack has a maximum processing speed of 1200 pieces per hour.

POSSIBLE TO  
COMBINE  
WITH:

### ROQ Pack

length (mm / inch)	2700 / 106.3"
height (mm / inch)	1650 / 65"
width (mm / inch)	1000 / 39.4"
Machine weight (kg / pounds)	570 / 1254
Dimension of the piece for packing (mm / inch)	270 - 450 / 10.6" - 17.7"
maximum diameter of the roll (mm / inch)	280 / 11"
maximum consumption (kVA)	3
compressed air consumption (l/min / cfm)	80 / 2.83
maximum production (pieces/h)	1200*

\*DIN A4 size  
- power supply: 230V+N, 2x230V, 3x230V, 3x400V+N - 50Hz or 60Hz

### HOW CAN ROQ Pack HELP YOUR BUSINESS?

**versatility**  
makes different bag sizes and it seals through temperature regulation

**money saving**  
auto calibration low maintenance

**easy to use**  
user friendly

**consistency**  
quick, accurate, efficient and safe
